Serial Reports No. 2017-9

Climate and human migrations in the Arctic Alaska in the past 30 thousand years: implications for carbon cycling and the first Americans

Speaker: Dr. Yongsong Huang

Brown University, USA

Time : 4:00 pm June 22, 2017

Venue : Conference Room, Ecology Building

(生态楼二层会议室)

Person to contact : Xiaojuan Feng (冯晓娟), 62836962

Brief Introduction of Speaker:

Dr. Huang is Professor of Earth, Environmental, and Planetary Sciences at Brown University. He specializes in the development and application of organic isotope geochemistry and organic analytical chemistry to problems in the environment, paleoclimate, paleohydrology, and astrobiology. His goal is to create new approaches and applying these approaches to understanding mechanisms and solving prominent problems in continental climatic change, environmental response to climate change, analysis and separation of complex organic mixtures and in astrobiology. Dr. Huang has published more than 160 papers in peer-reviewed journals including *Science*, *PNAS*, *Geology*, etc.
